SUMMARY

I am passionate about Full-Stack Developer, with a strong interest in leveraging modern technologies to create dynamic and user-centric applications. Over the past year, I have deepened my knowledge of new technologies and gained valuable experience through bootcamps and freelance work. My expertise encompasses building robust and feature-rich web applications, utilizing cutting-edge frameworks and tools to deliver impactful solutions.

FORMAL EDUCATION

Universitas Indonesia
Bachelor of Science – Physics

July 2018 – July 2022
GPA 3.51/4.00

EXPERIENCE

- Full-Stack Web Developer | Freelance | HiRE Indonesia

Jul 2024 – present

 - Designed a NoSQL database using Firebase for a job portal and event website, enhancing scalability and maintainability.
 - Developed APIs for front-end and back-end integration using Next.js.
 - Created a seamless and modern front-end website using Next.js and Tailwind CSS, optimizing the user experience.
- Media Marketing Manager | Full-Time | Exedu Start-up Project

Jul 2021 – Jul 2022

 - Designed a Google Sites-based website that supports over 1,500 users.
 - Created a website prototype using Figma to visualize and refine design concepts.
 - Collaborated with a content writer to optimize the user interface design in alignment with content, ensuring a responsive and seamless experience across all platforms.

NON FORMAL EDUCATION

- Mobile Flutter Superbootcamp Disnaker Jawa Barat 2024 | June 2024

 - Developed an E-Commerce and Point of Sale mobile app for Android and iOS using Flutter, integrating it with Firebase for backend functionalities.
 - Designed a NoSQL database with Firebase Firestore to ensure scalability and maintainability.
 - Implemented Business Logic Components (BLoC) for state management, promoting clean architecture and separation of concerns for improved maintainability and scalability.
 - Created an invoice exporter to convert invoice screens into PDF files.
- Mobile App Development with React Native Fresh Graduate Academy - Digital Talent Scholarship 2024 | May 2024

 - Created and led a team of four in developing a movie mobile app.
 - Consumed public APIs and performed data fetching following industry standards.
 - Utilized Git and GitHub for effective collaboration and version control.
 - Employed TypeScript for validation and static typing, enhancing collaboration and code reliability.
 - Implemented React Context and Provider for efficient state management.
- Laravel and NextJS Superbootcamp 2024 | March 2024

 - Created and led a team of four in developing an E-Commerce and Point of Sale website using Next.js for the front-end and Laravel for the back-end.
 - Utilized Git and GitHub for version control and team collaboration.
 - Designed an SQL database with MySQL to handle complex queries.
 - Employed Zod and TypeScript for validation and static typing, enhancing code reliability and team collaboration.
 - Used Zustand for state management, ensuring separation of concerns and resulting in clean code.
 - Implemented JSON Web Tokens (JWT) for secure authentication.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, PHP
Web Development: HTML, CSS, React, NextJS, Laravel, NodeJS, ExpressJS
Mobile Development: Flutter, React Native
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Version Control: Git, Github
Others: UI Design, Figma, Adobe Family
